## EXPERIENCE

**Flexential Inc**, Charlotte, NC                                       April 2016 – April 2018
*Application Developer*

- Part of a team responsible for designing and building a consumer-facing web application for customers, including front-end UI and logic as well as back-end components.
- Utilized **agile development** methodologies including a scrum board, two week sprints, daily standups, and bi-weekly sprint planning meetings with retrospectives.
- Designed and implemented new features and billing functionality for the customer portal website, including front-end UI, controllers, and API queries to back-end API in **AngularJS** and new views styled with **CSS**.
- Designed and implemented new features for the back-end API, including SQL scripts, controllers, and SOQL queries to Salesforce database in **PHP.**
- Wrote unit testing specs for front-end code using **Jasmine** framework and **Grunt** test runner, and for back-end code using **PHPUnit**.
- Additional training in C# and Angular 5 for future projects.
